

**DTV Consumer Education Quarterly Report
Second Quarter 2009
MB Docket No. 07-148**

PTI Pacifica Inc.

On February 20, 2009, PTI Pacifica Inc. was granted the 700 MHz Channel Block A license for Market BEA173 covering the Commonwealth of the Northern Mariana Islands ("CNMI") and Guam (call sign WQJZ314). As required by 47 C.F.R. § 27.20(b), PTI Pacifica Inc. is filing its second quarterly Digital Television Transition Education report for the period April 1 to June 30, 2009.

Please note that all three full-power television stations in Guam terminated analog service on or about February 17, 2009. Thus, the DTV transition in Guam was completed before PTI Pacifica Inc. received its 700 MHz license. Nevertheless, in its capacity as an eligible telecommunications carrier ("ETC") in Guam, PTI Pacifica Inc. continued to provide DTV transition information in its Lifeline and Link-up publicity campaigns in Guam pursuant to Section 54.418 of the FCC's rules. In accordance with Section 27.20(c) of the FCC's rules, this is the final report that PTI Pacifica Inc. is filing.

Note also that CNMI has only one licensed terrestrial television station. Because this station is a low power station, it is not yet required to convert to digital broadcasting as part of the DTV transition. For that reason, the Chief, Wireline Competition Bureau, granted PTI Pacifica Inc. (and its parent corporation, The Micronesian Telecommunications Corporation) a waiver for CNMI of the DTV transition notification requirements in Section 54.418 of the FCC's rules applicable to ETCs. *See Micronesian Telecommunications Corporation and PTI Pacifica Inc.*, 23 FCC Rcd 7091, DA 08-1029 (2008). Thus, PTI Pacifica Inc. did not conduct outreach regarding the DTV transition in CNMI.

Larry Knecht
Executive Vice President
